FOR IMMEDIATE RELEASE

Torus Insurance Licenses ProducerOne™ from Outline Systems, Inc.

Somerset, New Jersey – June 6, 2011 – [Outline Systems, Inc. \(OSI\)](#), a leading provider of IT solutions and services for insurance organizations, is pleased to announce Torus Insurance has signed a contract to license OSI's ProducerOne, a comprehensive producer management system that addresses the needs of insurance carriers by improving transparency and enhancing agency-carrier relationships and establishing true ease of doing business, to enable an efficient and flexible producer on-boarding process.

"Having completed the construction and implementation of ESCAPE, a broker portal for low touch/no touch policy submissions, streamlining our producer on-boarding process was a natural next step as we add admitted business to the site," said Justin Manley, Torus CTO in North America. "OSI's ProducerOne led the pack during our selection process."

OSI's deep experience in the property and casualty (P&C) industry, combined with the intuitive nature of ProducerOne which will enable business users to easily learn the new processes, were key factors in Torus' selection of the system. Further, OSI successfully demonstrated multiple facets of the product which will allow for a comprehensive approach to broker management over time.

By automating the producer licensing and compliance management processes, Torus is taking a major step in achieving straight-through-processing (STP) and becoming a company with which it is particularly easy to do profitable business. The capabilities provided by ProducerOne the company will take the producer lifecycle management, licensing and compliance process to new, more efficient levels.

"We are especially pleased to be working with Torus," said Bob Drake, director of sales at OSI. "Their entire team is committed to improving ease of doing business for the company and the company's producers. We are looking forward to being a part of that solution."

OSI executives will be available to discuss the capabilities of ProducerOne during the 2011 IASA Annual Educational Conference & Business Show being held June 5-8 at the Gaylord Opryland in Nashville. **For more information, please stop by the OSI Booth # 102, or visit the company website at www.outlinesys.com.**
